

## **NSE Exchange Connectivity Details**

### **Connectivity to Exchange**

For the Neat terminal default connection we are using VSAT for which the details are as follows :

Vsat ID - 21222

Gateway - 10.222.41.129

Tap IP - 10.222.41.130

Subnetmask - 255.255.255.240

VSAT Tap Box ID

CM : 2759

F&O : 2505

For the backup we had kept the Leas Line for which detail are as follows:

Circuit No: M4-CPR-5768-HCLF

Circuit ID: 3100028800

Leas Line Tap Box ID

CM : 4255

FO : 4379

Our Neat ID is converted on dual mode which can be used on VSAT as well as on Leas Line any time in case if VSAT connection goes down.

### **Connectivity to Branch**

To connect to branch we are using Neat CTCL mode for which we are using ODIN software the branch can connect to us via Internet. These connections are protected and filtered true secured firewall and antivirus.

For connectivity we use 2MBPS internet broadband connection From Airtel and for the backup for this connection we have two more internet connections from Reliance and MTNL which is also 2MBPS connections which can be used anytime if the primary connection goes off.
